

Singlet Single-use Conductivity Standard Solution, 1413 $\mu S/$ cm, KCl, 20 mL

Product #: 2771420

AED Price: Contact Hach

Singlet Solution Packs

Conductivity Standard Solution. Sealed foil pouches of 1413 uS/cm ± 0.1% at 25 °C. Potassium Chloride (KCl). Ready for use, 20 mL each

Ideal for on-site analyses

Sealed pouches are easy to transport - no risk of spillage.

Easy to Use

Just open the pouch and insert the electrode.

Fresh and reliable

Foil pouches prevent contamination and air exposure.

Design for use with Hach meters portfolio and other meters.

The basis for accurate Conductivity measurements is good care and calibration of the Conductivity cell.

Conductivity

Specifications

Parameter:

Concentration: $1413 \,\mu\text{S/cm}$ at $25^{\circ}\text{C} \pm 0.1\%$ at 25°C Description: Conductivity calibration solution

Formula: KCl NIST traceable: Yes

Package Type: Singlet

Quantity: 20 mL

Special remarks: Discard solution after use

Storage conditions: 10 - 25 °C (protect from light)
