Hazardous

Water ecology and limnology pertain to the physical, chemical and biological properties of fresh water, especially lakes, ponds and streams. These properties are essential for maintaining water conditions that are capable of supporting aquatic life. Many of these properties require that the measurement be made directly on-site.

Uses simple, fast color disc method to measure carbon dioxide, dissolved oxygen, and pH

Kit contains all required reagents and apparatus in a rugged carrying case for analysis in the field

Specifications

Application:	Ecology
Model:	CA-10WR
Number of tests:	100
Parameter:	Carbon dioxide, dissolved oxygen, and pH
Platform:	Color Disc
