Ships within 1 week

Intellical CDC401 is a digital, graphite, 4-pole conductivity cell with a temperature sensor. The laboratory version is available with a 3 or 1 m cable. The CDC401 is ideal for measuring electrical conductivity, salinity, resistivity, or total dissolved solids (TDS) in wastewater, drinking water, or general water quality applications.

Intellical digital probes provide ultimate traceability in conductivity measurement history

Stored time and date stamp for each measurement, operator and sample ID, calibration history, parameter, and probe serial number.

Intellical CDC401 digital conductivity probes alert the user when re-calibration is needed

No guesswork needed to provide the most reliable and accurate results with each measurement.

Intellical CDC401 digital conductivity probes can be moved between meters without the need to re-calibrate or re-enter measurement settings

Ideal for a multi-user environment with multiple HQD series Laboratory and Portable meters.
