Suggested replacements:

- B20B112

Reference electrode for voltammetry applications with screw cap. Liquid junction: porous pin, salt bridge solution: sat. KCl. Temperature range -10 to 60°C.

Specifications

Dimensions (D x L):	8 mm x 120 mm
Electrode junction :	Porous pin
Electrode type:	Laboratory reference electrode
Filling solution:	Saturated KCl
Length:	120 mm
Material:	Glass
Temperature range:	-10 - 60 °C
Warranty:	6 months
