### Specifications

|                              |   |
|------------------------------|---|
| Cable connection:            | S7 connector  |
| Diameter:                    | 12 mm   |
| Impedance:                   | 50 - 250 MΩ   |
| Length:                      | 120 mm  |
| Measuring range:             | 0 - 14 pH   |
| Operating temperature range: | 0 - 80 °C   |
| Sensor thread:               | Pg 13.5   |
| Special notes:               | Single glass electrode to be combined with separate reference electrode |
