Maximum uptime and reliability for TOC analysis in condensate applications

Through unique technology and semi-annual reagent replacement, the BioTector B3500c delivers 99.86% uptime with the lowest operating cost in condensate applications.

Reliable and accurate TOC monitoring allows plants to make confident decisions that protect capital equipment and avoid downtime. The BioTector B3500c, through its innovative oxidation technology, provides maximum reliability and uptime, without sacrificing accuracy. Industry leading reliability combined with low total cost of ownership make the B3500c a natural choice for continuous TOC monitoring in condensate applications.

Many additional versions available on request.

Worry-free TOC

With innovative two stage, advanced oxidation technology, the B3500c provides you with maximum reliability and uptime, without sacrificing accuracy.

Lowest cost of ownership

Requiring you to replace the sample pump tube and calibrate only twice a year, the Hach BioTector B3500c has the lowest operating cost available.

Small footprint = critical wall space savings

With one of the most compact analyser footprints, this analyser frees up wall space for other needed instruments.

Reagent costs that don't kill the bottom line

By only needing to replenish reagents every six months, you will see direct bottom line savings in comparison to other systems requiring biweekly or monthly replacements.

One instrument for multiple streams

Providing the ability to monitor two streams at the same time, eliminates the double-cost of needing two separate analysers.
