LCK cuvette tests: Minimum amounts of reagents, maximum safety.

Applicable for low range COD testing in water samples with high chloride concentrations up to 20,000 mg/L. No cumbersome sample pretreatment required! Pre-dosed reagents for maximum safety. Easy to use and photometric evaluation, packaged in a fully equipped box.

Precise and reliable measurement values

Maximum safety for users, thanks to the closed system and low amounts of reagents

Convenient and error-free dosing of the reagents

Barcode label for automatic recognition in the photometer

Differentiation between tests and measuring ranges by means of colour-coding
